EXPERIENCE

Frontend Developer   Jun '24 — Present
Blockon IT services Pvt. LTD   Gurgaon, India
- Using HTML, CSS, and JavaScript, I created and integrated user-friendly front-end components for the Web3preneur platform, improving the user interface as a whole.
- Incorporated React components into the design and development of a responsive web application (RWA) platform for real estate listings, enabling effective purchasing and selling features.
- Used cutting-edge frontend technologies to create and optimize user interface screens and pages for the Nextus & Masterverses Telegram mini app, boosting mobile responsiveness and user experience.
- Created the Nextus admin panel with CRUD API features included.
- React Native was used in the development of the Nufi wallet application's user interface to guarantee responsiveness on both iOS and Android smartphones. I used Stack Navigator and Stack Screens to implement navigation.

Frontend Developer   Sep '23 — May '24
Programmics Technology   Raipur, India
- Created and improved user interfaces using HTML, CSS, and JavaScript, using React.js functionality for particular modules and using Bootstrap for UI/UX enhancements and responsive design.
- Effectively managed code using Git and version control systems, encouraging smooth teamwork and making it easier to incorporate changes and UX improvements.
- To optimize functionality and frontend development best practices were put into practice, with a particular emphasis on adhering to accessibility guidelines and improving UI/UX design across a range of devices.
- Improved the overall user experience and usability by validating the application's responsiveness and accessibility across a range of devices and browsers.

Web Developer   Aug '21 — Sep '23
Shonav Creations Pvt. Ltd.   Raipur, India
- Maintained website functionality to enhance UX and drive engagement. Developed SEO-optimized landing pages, forms, and interactive components using HTML, CSS, and JavaScript, focusing on mobile responsiveness and UI/UX principles.
- Managed various Google tools including Adsense, Analytics, Search Console, YouTube Channel, and Google News Publisher to improve user experience. Oversaw webpage content and functionality utilizing core PHP for efficient administration and UX updates.

EDUCATION

Master in Computer Science, Disha College (GPA: 7.1)   Jan '18 — Jan '20
                                                                                   Raipur, India

PROJECTS

Webye Website Development, Webye Link   Raipur, India
- Developed a responsive mega menu for the website header and created dynamic content sections and containers using HTML, CSS, JavaScript, and Bootstrap. Ensured seamless navigation and optimized layout for enhanced user experience and functionality

IOV2055 Website Development, Blockon IT Services Pvt. Ltd Link   Gurgaon, India
- Designed and developed the IOV 2055 event landing page, focusing on creating an engaging and responsive layout. Utilized HTML, CSS, JavaScript, and Bootstrap to deliver a visually appealing and user-friendly interface, ensuring seamless navigation and optimal performance across devices.

Nextus Telegram Mini App, Blockon IT Services Pvt. LTD Link   Gurgaon, India

- Developed the Nextus Telegram Mini App with a Tap-to-Earn model, integrating Telegram bots for seamless user interaction. Utilized the Ngrok tool for secure local development and ensured smooth functionality and responsiveness across the platform.

Masterverses Website Development , Blockon IT Services Pvt. LTD Link   Gurgaon, India
- Designed and developed the Masterverses Landing Page for their TMA app, focusing on a modern, responsive layout. Ensured a visually appealing design and optimal performance to effectively highlight app features and engage users.

Real World Asset Tokenization, Blockon IT Services Pvt. Ltd Link   Gurgaon, India
- Developed the RealWorldAsset Tokenization platform's UI, enabling property listing, buying, selling, and tokenization. Designed and implemented user-friendly, responsive interfaces to streamline real estate transactions and enhance the overall user experience.

Nextus Admin Panel, Blockon IT Services Pvt Ltd Link   Gurgaon, India
- Developed the Nextus Admin Panel with CRUD functionality using React.js and Redux. Implemented state management for seamless data handling and created a responsive, user-friendly interface for efficient administrative operations.
